

ILAM PETROCHEMICAL CO

ILPC HDPE 7700M

HIGH DENSITY POLYETHYLENE

DESCRIPTION

HDPE 7700M is a natural, bimodal technology, high density polyethylene classified as a MRS 10.0 material (PE100) providing superior in mechanical properties and processability. HDPE 7700M also shows excellent resistance to rapid crack propagation and slow crack growth. HDPE77000M is produced under license from Mitsui.

TYPICAL APPLICATIONS

- Potable PRODUCT DESCRIPTION
- water pipes
- Drainage, Sewerage, Industrial pipes
- Corrugated pipes

(1) Typical values: not to be construed as specification limits.

(2) Based on compression molded sheet. Compression molding of test specimen according to ISO 1872-2 Conditioning of test specimen: temp. 23 °C, relative humidity 50 %, 24 hours

PROCESSING CONDITIONS

Typical processing conditions for HDPE 7700M: Met Tempreture:190-220

STORAGE AND HANDLING

Polyethylene material should be stored in a manner to prevent a direct exposure to sunlight and/or heat. The storage area should also be dry and preferably don't exceed 50°C. ILPC would not give warranty to bad storage conditions lead to quality deterioration and inadequate product performance.

Packaging

25 kg bag ,1375 Kg shrink film palletized.
